

SA-TAREI One Day Seminar

Receive 8 hours of TREC approved credit!

FRAMING INSPECTIONS!

April 21, 2012

Overview:

8:00 a.m. - 5:00 p.m.

House framing involves all the methods and materials used to create the structure of the home. It includes the foundation, walls, ceilings, roof, decks, openings and any other part of the home that must support weight. Most house framing is only visible from unfinished areas. This makes it difficult to spot defects unless you have a solid knowledge of framing. Join speaker J.D. Fuller as he presents this new FRAMING course to our local chapter.

Lunch WILL be provided courtesy of Larry Battarbee with Battarbee Insurance.
